VARIATIONS

Selected State (Active)

The selected state indicates the current, active item in the navigation. This state represents the item that is currently being interacted with such as the current page.

Menu Item

Unselected State (Normal)

The unselected state is the visual state of the menu item when it has not been interacted with or selected. The unselected state applies to all non-active items in the navigation. It's the default appearance for all items unless hovered or selected.

Menu Item

Hover State

The hover state is the visual effect that occurs when the cursor hovers over a navigation menu item, indicating interactivity. This state helps signal that the item is clickable or focusable.

Menu Item

Focus State

Navigation elements can be navigated using the **Tab** key on the keyboard. A blue border appears around the component when the focus state is applied.

OPTIONAL GUIDANCE BLOCKS

Don't:

Don't overload the navigation bar with too many items. Limit the number to five items.
