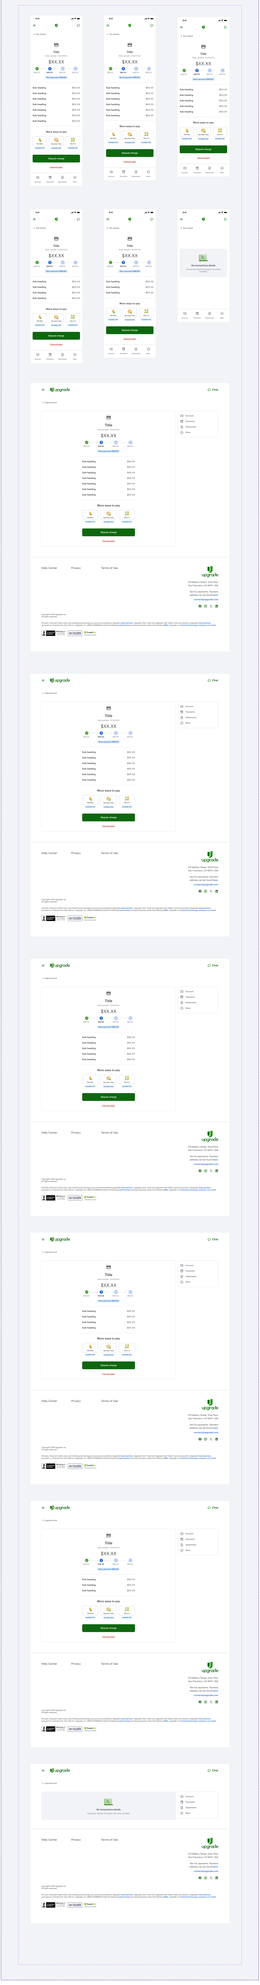
Transaction Details Page

Displays detailed information about a transaction, including amounts, payment progress, fees, dates, and related settings.

Transaction Details Page

Open Interactive UI Mock-Up File



VARIATIONS

Loading State

Displays a loading state while the transaction data presents (Can vary but all different cases. To be determined, when the data is available). For page suspense loading elements.

When the page is first loaded

- Display skeleton placeholders instead of content
- Show loading indicators until the transaction data is available

Skeleton coverage

- Amount (Title, Fee, Net, Gross, total amount)
- Transaction
- Sub-Transaction
- Payment Method
- Service Details (Subscription)
- Invoice (Invoice Number or Payment date)

Progressive Loading Order

Load in the order of the following table:

1. Key Page Information
   - Amount
   - Sub Text
   - Sub-Sub Text
2. Secondary Elements
   - Transaction
   - Sub-Transaction
   - Payment Method
3. Transaction Breakdown
   - Line Item Sum of Transactions
4. Actions
   - Payment Change
   - Cancel Plan
   - Change Plan
   - Cancel Plan

Each section appears its skeleton as soon as the data is available.
