File Upload

Design In Progress

Special input for the user to upload a document.

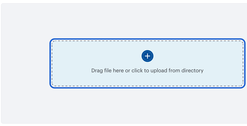
Main Component

Use Instance Of This In Your File

VARIATIONS

Focus State

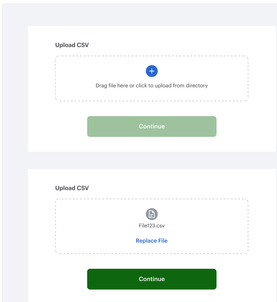
The File Upload component can be navigated using the **Tab** key on the keyboard. A blue ring appears around the File Uploader when the focus state is applied.



FILE UPLOADER GUIDELINES

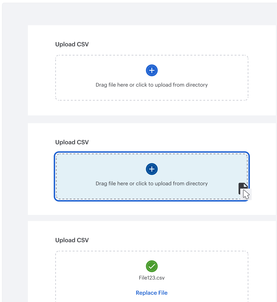
Manual Upload

User can select file or drag file into File Uploader and then manually press button to upload file.



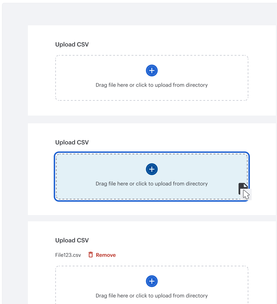
Auto-Upload

User can select file or drag file into File Uploader, which will automatically upload the file.



Multiple Uploads

User can select file or drag file into File Uploader, which will automatically upload the file.
Once a file is uploaded, it will populate on top of the uploader. User can remove the uploaded file



Disabled

When user hovers over the uploader, a tooltip will pop up with reason(s) why the uploader is disabled
