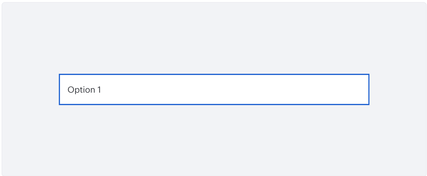
Focus State

The Dropdown Menu component can be navigated using the **Tab** key on the keyboard. A blue ring appears around the component when the focus state is applied.

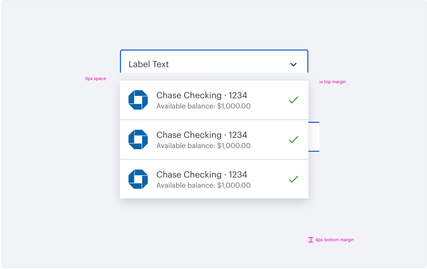


HOW TO USE

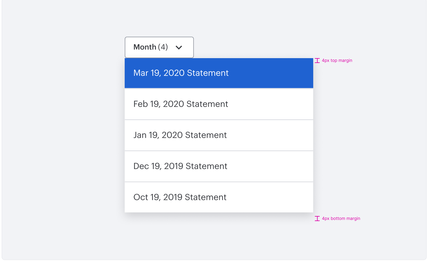
Use with focused state Input component

Top and bottom margins should be 4px. The dropdown menu should be placed on top of content. It should not push down any content.

Tip: To place a component over the auto layout, drag the component into the frame and then hold down the **space bar** key while dragging the component to the desired position (video tutorial).



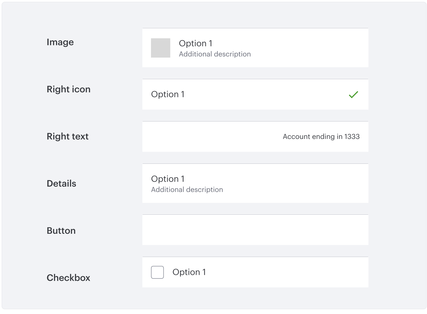
Use with filter/sort component



OPTIONAL ELEMENTS

Icons

Icons can be used on the right or left, but should not be used on both sides.

Logos


To replace the logo image, use (cmd opt c) to copy properties and then (cmd opt v) to paste properties. New logo image must be the same size as the blank square.
